Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 April 2001.

DETAILED ACTION

This Application has been examined. The original claims 1-4 are pending. The examination results are as following.

Priority

1. Receipt is acknowledged of a certified copy of the foreign application, JP 11-224203 filed 8/6/99, referred to in the oath or declaration or in an application data sheet. If this copy is being filed to obtain the benefits of the foreign filing date under 35 U.S.C. 119(a)-(d), applicant should also file a claim for such priority as required by 35 U.S.C. 119(b). If the application being examined is an original application filed under 35 U.S.C. 111(a) (other than a design application) on or after November 29, 2000, or an application in which applicant has requested voluntary publication, the claim for priority must be presented during the pendency of the application, and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior foreign application. See 37 CFR 1.55(a)(1)(i). If the application being examined has entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the claim for priority must be made during the pendency of the application and within the time limit set forth in the PCT and Regulations of the PCT. See 37 CFR 1.55(a)(1)(ii). Any claim for priority under 35 U.S.C. 119(a)-(d) or (f) or 365(a) or (b) not presented within the time period set forth in 37 CFR 1.55(a)(1) is considered to have been waived. If a claim for foreign priority is presented after the time period set forth in 37 CFR 1.55(a)(1), the claim may be accepted if the claim properly

Art Unit: 2674

identifies the prior foreign application and is accompanied by a grantable petition to accept an unintentionally delayed claim for priority. See 37 CFR 1.55(c).

Information Disclosure Statement

2. The examiner has considered the references listed in the information disclosure statement (IDS) filed 4/2/01 (Paper No. 5) (see attached form PTO-1449).
3. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

4. Figure 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated (Applicants have admitted that in the specification page 6, lines 7-8). See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2674

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

6. Claims 1, 2, and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Albert et al (U.S. Patent 6,252,564, hereinafter referred to as Albert).

7. Regarding claim 1, Albert teaches an electrophoretic display device 40 comprising: a substrate layer 42; a conductive film 44 formed on the substrate layer 40; a microcapsule layer 46 (a display media 46) having a plurality of microcapsules 50 (optoelectrically active components 50) containing a liquid dispersion medium and electrophoretic particles (Albert says that the optoelectrically active components 50 is an encapsulated electrophoretic display material, which includes well-known components: a liquid dispersion medium and electrophoretic particles); and a urethane resin layer 48 (an adhesive layer 48 using urethane) (see FIG. 5A, col. 12, lines 14-38).

8. Regarding claims 2 and 4, Albert further teaches that the urethane resin layer 48 is formed from a urethane resin layer composition (a polyurethanes material); and the conductive film 44 is an optically transmissive electrode 44 (see references recited above). Claims 2 and 4 are dependent upon claim 1, and are rejected on the same reasons set forth in claim 1, and by the reasons noted above.

Allowable Subject Matter

9. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. The following is a statement of reasons for the indication of allowable subject matter:

The present invention is directed to an electrophoretic display device. The dependent claim 3 identifies the uniquely distinct features "the urethane resin layer (18) is formed to a thickness of 20 to 200 μm ". The closest prior art, Albert et al (US 6,252,564) and Jacobson et al (US 6,323,989) disclose conventional electrophoretic display devices, either singularly or in combination, fails to anticipate or render the above underlined limitations obvious.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (see form PTO-892).

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HENRY N. TRAN whose telephone number is (703) 308-8410. The examiner can normally be reached on Mon - Fri from 8:00AM - 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, RICHARD A. HJERPE, can be reached at (703) 305-4709.
